

**LET'S
CONNECT
WITH THE
FUTURE!**

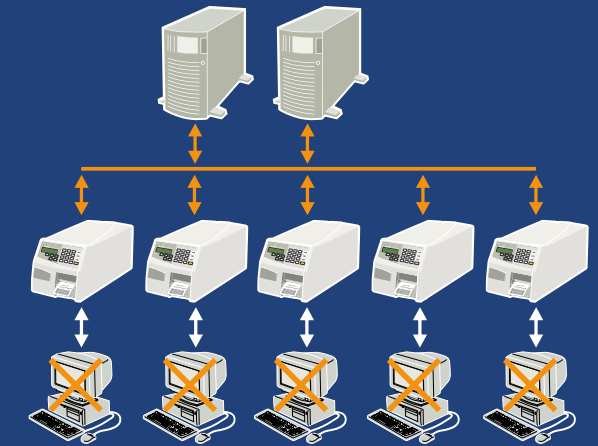

- EasyLAN 100i
- INTERMEC PRINTER NETWORK MANAGER
- INTERMEC PRINTER APPLICATION SERVER

PC-Free Effectiveness

Reduce your hardware investments and maintenance costs! Locate your printers right at the point of application without the need for dedicated PCs or terminals! Your printers can independently access and print data from any Open Database Connectivity (ODBC) database.

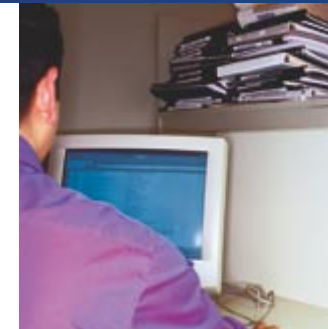

SAVE TIME, RESOURCES AND COST!

Internet printing offers the most complete and flexible tool available for remote printer management.

In today's fast-paced world, using automated data collection equipment to track goods and inventory throughout a business is essential. The ability to produce the right

labels where you need them, when you need them, is a prerequisite for keeping operations running smoothly.

Save time, resources, hardware, and space. Minimize downtime and logistic errors. Take full advantage of today's possibilities and connect with the future!

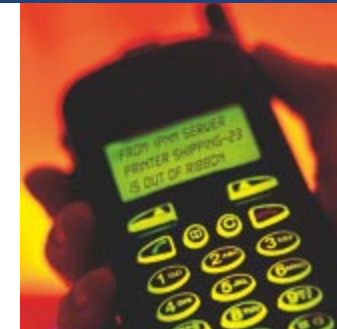

Full Remote Printer Management

Configure and maintain your printers from where it's convenient! The EasyLAN™ 100i setup and maintenance package provides the most flexible and efficient printer management tool available. Full interface configuration, status information, and setup control are accessible through any standard Web browser from any location at any time.

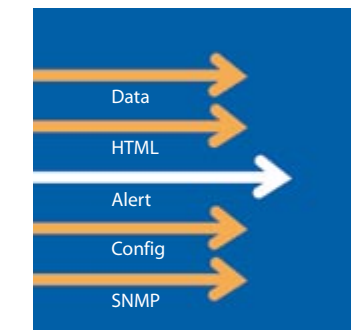

Print over the Web

Print labels from connected printers anywhere in the world, regardless of software platform! The labels are stored as Web forms right in each printer. All it takes is a standard Web browser and your printers' URL addresses.

Timely Alerts

Receive customized messages, preventive alerts, or real-time error messages by e-mail, pager, or hand-held computer or as a text message on your cellular phone. Since most failures occur during printing, timely alerts help to avoid unnecessary delays and ensure maximum production efficiency, while multi-device messaging provides the ultimate in convenience.

Unique Accessibility

The unique high-speed, multichannel interface allows you to communicate with your printers at all times without affecting ongoing jobs or jobs in the queue. Important alert messages will always come through, even if the printer is busy processing incoming data.

Intermec

INTERNET PRINTING BY INTERMEC

EasyLAN100i Ethernet interface including basic software

| | |
|---|--|
| Multichannel Interface | Printers always accessible for status monitoring and set-up, even when heavy print jobs are required. The multichannel interface uses separate channels for printing, monitoring and web browser access. |
| Printer Web Management | Simple management of any printer on the network. EasyLAN100i-equipped printers can be set up and supervised with any web browser. |
| Alerts through standard SNMP tools | Minimize downtime by getting alerts from your existing supervision system. EasyLAN100i works with any standard SNMP network supervision software such as HP Open View or Tivoli. |
| HP JetAdmin | JetAdmin/Web JetAdmin compatible. |
| Web-based printing | Use your existing hardware to print labels from any web browser, independently of operating system – Macintosh, Unix or Windows. |

*Additional software

| | | Free with EasyLAN100i | Printer Network Manager | Printer Application Server |
|--|---|-----------------------|-------------------------|----------------------------|
| Printer Grouping | Printers are treated as groups. Makes setup fast and ensures consistent handling of printers. | ● | | |
| Printer View | View all EasyLAN-equipped printers in one view! | ● | | |
| Alerts through e-mail | Individual or group messages. | ● | ● | |
| Alerts through SMS | Text message to cellular phone. | ● | ● | |
| Customized Alerts | Enables custom messages for any desired warning or error condition. | | | ● |
| Access of host ODBC's databases | Enables printer(s) to access host databases directly, without installing a client. | | | ● |

*Requires EasyLAN100i Ethernet card.
