It's a fact...industry requires tough, high-speed equipment. The IQ plus 310A is built tough with an all-steel enclosure, available in standard or NEMA 4 versions, for extra long life in industrial environments.

A simple five-button front panel and bright, bold display provide easy operation and monitoring. Two digital inputs offer "remote" pushbutton control of any two of the five front panel keys and keypad lockout.

Fully compatible with Allen-Bradley (A-B) Remote I/O and Profibus DP, the IQ plus 310A provides a fast, simple and affordable networking solution for open access to other measurement and control devices.

With a speed of 50 updates/second typical, the IQ plus 310A can be configured for a variety of applications. Advanced digital filtering and selectable display update rates make the unit ideal for standard and high-vibration applications.

Two standard serial ports provide an interface to peripherals such as printers and computers. Unique formattable data communications allow for positioning of weight data on a ticket.

Applications

- Straight weighing
- Truck scales
- Shipping and receiving
- Mechanical conversions
- Panel mounting

Standard Features

- 50 updates/second
- Selectable display update rate
- 5-button operation
- Selectable units: lb, kg, ton, T, gram, grain, oz
- Steel enclosure with two-part epoxy finish
- Bright, bold Vacuum Fluorescent Display (VFD)
- Full front-panel digital calibration and configuration
- Universal mounting stand
- Two communication ports, (1) simplex, (1) full duplex
Printer port selectable RS-232 or 20 mA current loop, RS-232 for the EDP port
- Two inputs for remote operation of any front-panel key or keypad lockout
- RATTLETRAP[®] vibration control

Options/Accessories

- 35888 Allen-Bradley Remote I/O, 115 VAC (external)
- 36593 Allen-Bradley Remote I/O, 230 VAC (external)
- 49974 PROFIBUS[®] DP Interface, 115 VAC (external)
- 49975 PROFIBUS[®] DP Interface, 230 VAC (external)
- 30352 Panel mount
- 19355 BCD Output, 115 VAC (external)
- 19366 Load cell port quick connect
- 19367 Serial port quick connect
- 22979 Additional operating manual

NOTE: Because A-B Remote I/O and Profibus DP interface with programs written by non-RLWS parties, please consult factory for latest technical updates before quoting.

PART #	DESCRIPTION
51968 IQ plus 355, 115 VAC
66729 IQ plus 355, 230 VAC, CE marked/OIML approved

The IQ plus 355 is a product built to outlast and outperform any indicator in its class.

Providing the ultimate protection is an all stainless steel NEMA 4X/IP66 washdown enclosure that means extra-long life even in the harshest conditions. This cost-effective indicator also reduces operator error and accelerates productivity with an extra-large 6-digit LED display.

The IQ plus 355 drives up to eight 350-ohm load cells for use in multi-cell applications such as truck scales. It also features three-stage digital filtering, virtually eliminating vibration interference and providing stable, accurate weight data regardless of the environment. A simple five-button front panel provides easy operation, and full calibration and configuration.

Two independent communication ports provide full EDP and print ticket programmability—a feature that is enhanced by Revolution™ Scale Software. This unique Windows®-based software allows the IQ plus 355 to easily program up to two 300-character ticket formats. In addition, the two standard serial ports allow it to be remotely configured and calibrated using Revolution Scaleware.

Applications

- Straight weighing
- Agricultural
- Truck scales
- Floor and bench scales
- Tank weighing

Standard Features

- Large .8" (20.3mm) Light Emitting Diode (LED) Display
- Configurable analog to digital measurement rate
- Power for eight 350Ω load cells or sixteen 700Ω load cells
- Primary/secondary units configuration: lb, kg, ounces, short tons, metric tons, grams, or none
- NEMA 4X/IP66 stainless steel washdown enclosure
- 5-button operation
- 2 independent communication ports: (1) full duplex, (1) unidirectional or active 20 mA current loop
- Standardized EDP command sets
- Programmable ticket formats up to two 300-character printouts
- Full front-panel digital calibration and configuration
- Universal mounting stand
- Three-stage digital filtering
- Consecutive transaction numbering

Options/Accessories

- 43381 Analog output: selectable 0-10V, 4-20 mA
- 52948 Panel mount kit
- 46030 Revolution™ Scale Software
- 51980 Additional operating manual

PART #	DESCRIPTION
48815 IQ plus 390-DC, Battery powered with 115 VAC wall adapter
50064 IQ plus 390-DC, Battery powered with 230 VAC wall adapter
66727 IQ plus 390-DC, Battery powered, CE marked (voltage adapter sold separately)

Featuring DC operation, a huge 1-inch, six-digit LCD display, and a stainless steel NEMA 4X/IP66 enclosure, the IQ plus 390-DC delivers heavy-duty performance without a heavy-duty price.

With a battery life in excess of 300 hours utilizing one load cell, the IQ plus 390-DC not only outperforms rivals but enhances productivity by reducing operator error with its easy to read display. And unlike most competitive units, the IQ plus 390-DC features a piece count mode that allows the indicator to serve as a part of a portable counting scale system. For added efficiency, it includes a configurable standby mode that saves battery life and an AC adapter for flexible operation.

The IQ plus 390-DC is encased in a stainless steel NEMA 4X/IP66 enclosure for long lasting performance regardless of environment. In addition, three 300-character ticket formats are easily programmed using Revolution™ Scale Software. This unique Windows®-based software also allows simple remote calibration and configuration of the IQ plus 390-DC.

Suitable for multi-cell applications, the IQ plus 390-DC runs on standard C-cell alkaline batteries and drives up to four 350-ohm load cells. It also incorporates RATTLETRAP® three-stage digital filtering that provides stable, accurate weight data regardless of the environment. A six-button panel provides simple operation, calibration, and configuration.

Applications

- Washdown environments
- Portable scales
- Warehousing
- Floor and bench scales
- Agricultural
- Portable counting

Standard Features

- NEMA 4X/IP66-rated stainless steel enclosure
- Large 1" (24.5mm), six-digit Liquid Crystal Display (LCD)
- 6-button operation
- Power for four 350Ω load cells or eight 700Ω load cells
- Configurable units multiplier
- Supports 4- and 6-wire load cell connections
- EDP port for full duplex, RS-232 communications
- Powered by 6 "C" cell alkaline batteries for complete portability (batteries not included)

PART #	DESCRIPTION
52486	IQ plus 590-DC, battery powered with 115 VAC wall adapter
52485	IQ plus 590-DC, battery powered with 230 VAC wall adapter
66728	IQ plus 590-DC, battery powered, CE marked (voltage adapter sold separately)

Take full advantage of your weighing system with the new IQ plus 590-DC. Featuring C-cell battery power and a full numeric keypad, this handy unit makes setup and operation a snap! From tare entry to counting, the IQ plus 590-DC allows numeric entry directly from the keypad, saving time by eliminating the need to scroll and toggle.

The IQ plus 590-DC has a superior battery life of over 300 hours, meaning weeks or months of worry free operation! And with a stainless steel NEMA 4X/IP66 enclosure, you can rely on top performance in any environment. It's the perfect solution for outdoor weighing systems, portable warehouse scales, and material handling applications.

The IQ plus 590-DC's prominent LCD display shows up to six numerals in large one-inch digits for easy character recognition. When left idle, the unit prolongs battery life by using a configurable standby mode. This unique indicator even serves as a portable counting scale in piece count mode with sample size or average piece weight entry. Plus, an AC adapter is provided to prolong battery life when power is available.

In environments where vibration is a concern, the IQ plus 590-DC includes RATTLETRAP[®] three-stage digital filtering and selectable measurement rates, ensuring accurate weighments anywhere, anytime.

ANOTHER **REVOLUTION** SOLUTION

PART #	DESCRIPTION
44543 IQ plus 510, 115 VAC, sloped face
44542 IQ plus 510, 230 VAC, sloped face
45526 IQ plus 510, 115 VAC, flat face, deep enclosure

52054 IQ plus 510, CE 230 VAC, sloped face
52053 IQ plus 510, CE 230 VAC, flat face, deep enclosure

The IQ plus 510 offers an exceptional combination of high-performance and affordability.

Completely menu driven and featuring a large 16-character alphanumeric VFD display, the IQ plus 510 simplifies operation and reduces operator error, even in the most poorly-lit environments. Additionally, operator productivity is optimized by the IQ plus 510's intuitive panel display and simple five-button keypad.

Operating at a speed of 30 updates/second, the IQ plus 510 consistently delivers timely and accurate weighments. Two independent communication ports enable simple setup and programming through Revolution™ Scale Software. It is encased in a tough, all stainless steel NEMA 4X/IP66 enclosure for maximum protection from the harshest environments. The IQ plus 510 is available in a panel-mountable flat face model or a convenient sloped face model.

Two independent communication ports provide full EDP and programmable printer ports. Using Revolution™ Scale Software, print tickets can be programmed with up to six 300-character formats and the two serial ports support attached printer, remote displays, or remote configuration/calibration. Five-point linearization calibration ensures the highest accuracy in every application.

Allen-Bradley and Profibus DP enabled, the IQ plus 510 interfaces with networks for fast, simple, and accurate measurement and control of complex, multi-ingredient batching and blending.

Applications

- Industrial weighing applications
- Truck scales
- Straight weighing

Standard Features

- 8 digital inputs
- Selectable analog-to-digital measurement rate
- Operates on 115 or 230 VAC
- Two communication ports: (1) EDP port, full duplex RS-232 or RS-485, (1) printer port, simplex RS-232 or 20 mA
- Three programmable ticket formats, up to 300 characters each
- Power for eight 350Ω load cells or sixteen 700Ω load cells
- NEMA 4X/IP66 stainless steel enclosure
- Completely menu driven
- Front panel or EDP serial interface calibration
- Simple operation with 5-button keypad
- Intuitive display
- Large 0.75" (19mm) Vacuum Fluorescent Display (VFD)
- Key functions: zero, tare, gross/net, print, units
- 5-point linearization calibration
- Time and date

For those seeking maximum digital performance—the IQ plus 710 delivers. Designed and built to provide superior programmability and durability, the IQ plus 710 offers an array of advanced features.

Utilizing a large VFD display and full alphanumeric keypad, the IQ plus 710 can store and display 16-character programmable user prompts, 300 truck ID numbers, or part numbers. Four programmable macro function keys (each capable of 30 steps) enable the IQ plus 710 to quickly and accurately complete a variety of functions. Additionally, macros can be linked to setpoints during batching operations, allowing the macro to initiate each batch setpoint. For easy operation, all functions and parameters are selected by menus.

Two independent communication ports provide full EDP and programmable printer ports. Using Revolution™ Scale Software, print tickets can be programmed with up to six 300-character formats and a 300-character title block. Furthermore, two serial ports allow remote configuration and calibration. Five-point linearization calibration ensures the highest accuracy in every application.

Allen-Bradley and Profibus DP enabled, the IQ plus 710 interfaces with networks for fast, simple, and accurate measurement and control of complex, multi-ingredient batching and blending.

The IQ plus 710 is encased in a tough, all stainless steel NEMA 4X/IP66 enclosure and is available in a flat face model or sloped face. The flat face is panel-mountable and features a deeper enclosure, allowing it to utilize an A-B I/O, as well as two, 4-channel relay boards, and an analog output option. The sloped face model utilizes the analog output option and either the A-B I/O option or the one 4-channel relay boards.

Applications

- High-performance industrial weighing
- Batch weighing
- Truck weighing applications

Standard Features

- Stainless steel NEMA 4X/IP66 washdown enclosure
- Large 0.75" (19mm) Vacuum Fluorescent Display (VFD) with 16 characters for operator prompting
- Selectable analog to digital measurement rate
- 5-point linearization calibration
- 4 macros, 30 steps each, ability to interconnect macros with setpoints (macro can start batch setpoints)
- 8 digital inputs plus 8 digital outputs
- 60 16-character programmable fields for display prompts.
- Power for eight 350Ω load cells or sixteen 700Ω load cells
- Expanded 29-key alphanumeric keyboard
- Full alphanumeric keyboard for entering truck ID, numbering, prompts, etc.
- 300-ID truck in/out programs (6 modes)
- Batching and continuous mode setpoint functions
- Programmable consecutive numbering
- Two communication ports: (1) EDP port, full duplex RS-232 or RS-485, (1) printer port, simplex RS-232 or 20 mA
- Operate, configure and calibrate via 2 interfaces: front panel (keyboard & display) or EDP serial command port (RS-232, RS-485)
- Six 300-character programmable output formats, independent transmission to EPD or printer port
- 300-character alphanumeric "title block" for custom printouts
- Completely menu driven
- Angled/sloped keypad for user comfort
- Time and date
- Accumulator

Options/Accessories

- 43381 Analog output: selectable 0-10V, 4-20 mA
 - 45409 Allen-Bradley Remote I/O (internal)
 - 49976 PROFIBUS® DP Interface kit (internal)
 - 45408 4-channel internal relay board (requires two for 8 relays)
 - 45410 Panel mount kit (flat face only)
 - 19369 Batching start/stop switch box
 - 46030 Revolution™ Scale Software
 - 45391 Additional operating manual
- I/O relay modules sold separately:**
- 15969 10-32 VDC Input relay module (N/O)
 - 15970 Dry contact 100 VDC/1.5A output (N/O)
 - 22848 Dry contact 100 VDC/1.5A output (N/C)
 - 15971 115 VAC Output relay module (N/O)
 - 15972 115 VAC Input relay module (N/O)
 - 22847 115/230 VAC Output relay module (N/C)
 - 36632 115/230 VAC Output relay module (N/O)
 - 36631 230 VAC Input relay module (N/O)
 - 16478 Quencharc arc suppressor

The IQ plus 800 indicator sets new standards in versatility. With its NEMA 4X stainless steel enclosure, full numeric keyboard, and bright display, this unit can be desk-, panel-, or wall-mounted. This unique indicator powers up to 16 350-ohm load cells on one or two separately configured scales*. An optional LED bar graph enhances software capabilities and offers interactive operation for truly flexible performance.

Compatible with Allen-Bradley (A-B) and Profibus DP, the IQ plus 800 provides fast, simple, and accurate measurement and control of complex, multi-ingredient batching and blending*.

The IQ plus 800 stores up to 200 six-digit truck ID numbers and truck tares, and allows setup in any of six different operating modes, meeting a wide range of truck scale applications. The formattable print tickets for truck weigh-in and weigh-out allow up to 300 characters, and can be set via the EDP port or front keypad.

The IQ plus 800 provides 20 setpoint steps that can be assigned to any of the 4 standard and 12 optional digital outputs. Three digital inputs are also standard. Our exclusive RATTLETRAP® vibration control is ideal for batching applications where scales are subjected to a high degree of industrial vibration.

With the addition of JetPak™, weigh data processing is performed at least five times faster than with conventional meters. At an impressive rate of 100 updates-per-second, this indicator is ideal for high-speed bag filling, checkweighing, and multi-step batching operations. An array of additional hardware and software options offer virtually unlimited solutions for your complex operations.

Applications

- Sophisticated truck in/out management systems
- Multiple-scale operation of up to 2 scales*
- Material flow control*
- High-speed bag filling and checkweighing*

Standard Features

- NEMA 4X stainless steel enclosure
- Bright, bold Vacuum Fluorescent Display (VFD)
- Full keyboard for setpoint or fixed tare entry
- Time and date
- 20 updates/second, nominal
- Advanced digital filtering, RATTLETRAP® vibration control
- 20 programmable setpoint steps
- Multi-channel accumulators
- 3 digital inputs, TTL or hard contact closure, 4 TTL digital outputs standard, expandable to 16
- Multi-functional 200 ID Truck in/out program
- Selectable print data and format via EDP port or front keypad
- 2 communication ports: (1) EDP port, full duplex RS-232 or 20 mA, (1) printer port, simplex RS-232/20 mA current loop
- Multi-scale control expandable to 2 scale inputs, with individual scale setup*
- Power for up to sixteen 350Ω load cells on single or dual channels*
- Formattable print tickets for Gross, Net, Truck Weigh-In/Weigh-Out, and setpoint push print ticket
- Models with JetPak feature 100 Hz A/D for 100 updates per second, single channel unit*

The IQ plus 810...a digital weight indicator with power. Its unique hybrid digital circuitry provides faster, more accurate and more flexible performance than conventional technology. Providing power for 16 350-ohm load cells on up to four individually configured scales*, this unit simplifies multi-scale control. Housed in a NEMA 4 enclosure, the IQ plus 810 incorporates a full numeric keyboard, and a bright display that's easily readable, even in poor lighting. An optional LED bar graph enhances software capabilities and interactive operation.

Our exclusive RATTLETRAP® vibration control eliminates interference from agitators, mixers, blenders, fork truck traffic, and other sources of industrial environment vibration.

Allen-Bradley (A-B) and Profibus DP enabled, the IQ plus 810 interfaces with networks to provide fast, simple, and accurate measurement and control of complex, multi-ingredient batching and blending*.

The IQ plus 810's programmable setpoint software offers a comprehensive array of batch process possibilities. It's even self correcting, learning as it works to assure your process integrity. The standard configuration includes 20 setpoint steps, 4 digital outputs and 3 digital inputs, providing more basic power than many custom controllers. With the addition of JetPak™, weigh data processing is performed at least five times faster than conventional meters. At an impressive rate of 100 updates per second, it's ideal for high-speed bag filling, checkweighing, and multi-step batching operations.

Applications

PROFIBUS[®] DP Interface

PART #	DESCRIPTION
49974 PROFIBUS DP Interface, 115 VAC (external)
49975 PROFIBUS DP Interface, 230 VAC (external)
49976* PROFIBUS DP Interface kit (internal)

* For use with IQ plus 510 & 710 indicators

Providing a fast, simple and affordable network communication solution, our IQ plus[®] 310A, 510, 710, 800 and 810 indicators interface with Profibus DP, a powerful and open field bus that delivers fast response times. Through our DP interface, you have instant access to over 3,000,000 Profibus devices, with approximately 2,000 unique products.

Profibus is an effective multi-vendor interface device that communicates information between Siemens automation systems and distributed field devices. Utilizing a minimal amount of hardware, Profibus DP creates a high-speed serial link that transmits information such as input and output data, parameters, diagnostic data, and programs to other devices.

The IQ plus 310A, 800 and 810 indicators function with a stand alone, external version, while the IQ plus 510 and 710 indicators work with an internally mounted version of Profibus DP. Indicators already in the field can be easily retrofitted with the interface on-site without causing costly delays to your customers' operations. Older versions can be retrofitted at the factory with a small hardware change.

Applications

- Automated process weighing
- Material flow control
- Multi-scale monitoring and manipulation
- IQ plus[®] 310A, 510, 710, 800, and 810 compatible

Standard Features

- DP intelligent slave
- Open configuration permits plug & play
- Standard GSD file on disk
- 128 selectable addresses
- Auto sensing baud rate up to 12 megabaud
- 4-word, 8-bit format
- Generates up to 32-bit word
- Complies with EN50170 standard
- Fast data exchange, less than 10 milli-seconds
- Supports sync & freeze mode
- RS-232 or 20 mA interface
- On board LED diagnostics

Additional features with IQ plus 310A & 510:

- 5-button operation
- Panel mountable
- High-speed update rate

Additional features with IQ plus 710:

- Local batch control
- 8-digital outputs, 8-digital inputs
- Display messaging

Additional features with IQ plus 800 & 810:

- Drives up to 4 scales
- 16 digital outputs, 3 digital inputs
- Enclosure types: panel mount, stainless steel, FRP, and XPCD

Options/Accessories

- 50955 Operating manual, external version (800/810/310A)
- 52579 Operating manual, internal version (510/710)

NOTE: Because this product interfaces with programs written by non-RLWS parties, please consult factory for latest technical updates before quoting.

Allen-Bradley Remote I/O

PART #	DESCRIPTION
35888	Allen-Bradley Remote I/O, 115 VAC (external)
36593	Allen-Bradley Remote I/O, 230 VAC (external)
45409	Allen-Bradley Remote I/O (internal)

Our most powerful digital indicators are now Allen-Bradley (A-B) enabled! Utilizing the A-B remote I/O option, our IQ plus® 310A, 510, 710, 800, and 810 digital indicators provide an interface to any of the over one million existing A-B PLCs.

Two configurations are available; standalone, external version for use with the IQ plus 310A, 800, and 810 or internally mounted in the IQ plus 510 and 710.

The versatile IQ plus 810 allows up to 4 scales or 16 load cells to be controlled through a single A-B remote I/O interface. In addition, fully programmable setpoints and configurations can be downloaded from the PLC directly to the indicators. Both discrete and block data transfer modes are supported by the A-B remote I/O option.

Existing IQ plus 800 and 810 indicators (version 3.0 or later) can be retrofitted in the field with the A-B option. Older versions can be retrofitted at the factory with a small hardware change.

Economical and efficient, our IQ plus 310A and 510 digital indicators also interface with A-B networks by using the A-B remote I/O option.

Applications

- Automated process weighing
- Material flow control
- Multi-scale monitoring and manipulation
- IQ plus® 310A, 510, 710, 800, and 810 compatible

Standard Features

- 115 or 230 VAC operation
- Discrete data transfer
- Block data transfer
- Field-retrofitting available for existing IQ plus® 800/810 and IQ plus 310A indicators
- Blind keypad capability (IQ plus 800/810)
- NEMA 4X stainless steel enclosure

Additional features with IQ plus 310A & 510:

- 5-button operation
- Panel mountable
- High-speed update rate

Additional features with IQ plus 710:

- Local batch control
- 8-digital outputs, 8-digital inputs

CONDEC™ UMC222 Digital Weight Indicator

NEW!
Product

Combining durability, performance and affordability, the UMC222 includes more features than most weight indicators in its class. From bench and floor scales to railroad track and motor truck scales, the UMC222 weight indicator is the ideal solution for light to heavy industrial applications.

The UMC222 incorporates easy-to-use front panel calibration and configuration, simplifying installation and setup. It's housed in a NEMA 4X stainless steel enclosure for maximum protection in harsh environments, and offers digital filtering for accurate weighments in areas where vibration is a factor. Assisting in data management, the UMC222 provides a 10-digit accumulator for calculating total weight, time and date, and sequential ticket numbering. It also offers a counting mode, and optional battery power for portable applications.

Applications

- Bench, tank, floor, railroad track, and truck scales

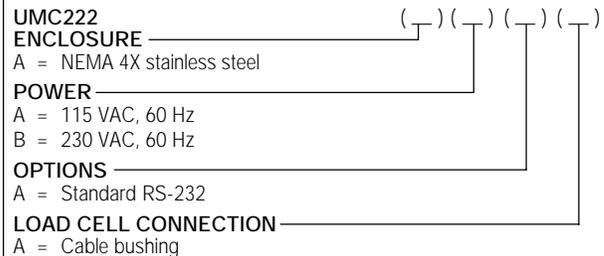

Standard Features

- Easy to use front panel configuration
- Adjustable high-performance digital filter
- Smart Serial™ ticket formatting
- Adjustable digital filter for low frequency vibration
- NEMA 4X stainless steel enclosure
- Time and date
- 10-digit accumulator
- Supports 4- and 6-wire connections
- Count mode
- One digital input

Options/Accessories

- 55255 Serial expander assembly (RS-485, RS-422, 20 mA loop)
- 55262 Panel mount bracket
- 55268 Battery option
- 64983 Additional operating manual

Approved

The UMC444 digital weight indicator combines proven technology with user-friendly configuration and calibration—all in one economical package. The UMC444 is available in a mild steel painted enclosure with a tilt stand base or with panel mounting brackets, a NEMA 4X stainless steel enclosure, and even an uncased board set for custom applications. Standard 20mA current loop communications also provides a printer interface.

CONDEC™ UMC555 Digital Weight Indicator

The UMC555 is a rugged industrial digital weight indicator designed for simple operation in a variety of applications. The UMC555 is available in a mild steel painted enclosure with a tilt stand base, panel mounting brackets, or an uncased version for custom applications. Primary applications include platform scales, tank scales, truck scales, and railroad track scales.

The UMC555 also offers BCD output (UMC2000 compatible), RFI/EMI shielded, (12-bit) optically-isolated 4-20 mA or 0-10VDC analog output, and versatile battery operation.

Applications

- Mechanical conversions
- Straight weighing

Standard Features

- Four-button operation
- Mild steel NEMA 1 enclosure
- Tilt stand base
- Front-panel calibration
- Zero, Net/Gross, Tare and Print keys

CONDEC™ UMC600 Digital Weight Indicator

Measurement
Canada
Approved

Excelling a variety of demanding most applications, the UMC600 is one of the most versatile weight indicators available today. It offers simple prompting sequences for easy calibration and configuration. It locks in the most accurate weighments with features like automatic zero tracking (AZT) and 80,000 displayed graduations. Encased in a NEMA 4X stainless steel enclosure, the UMC600 ensures long-lasting performance and durability regardless of the environment.

CONDEC™ UMC612 Digital Weight Indicator

Measurement
Canada
Approved

The UMC612 digital weight indicator offers advanced capabilities and performance for checkweighing, draft weighing, and setpoint control or automatic batching applications. Utilizing new conversion technology, the UMC612 processes up to 100 conversions per second, features bi-polar resolution up to 1 million counts, and is easily configured for custom applications.

Available in a stainless steel NEMA 4X enclosure, the UMC612 also features full EMI/RFI-shielding, dual serial ports, time and date display, and expansion capabilities.

Applications

- Checkweighing, draft weighing, setpoint control, automatic batching

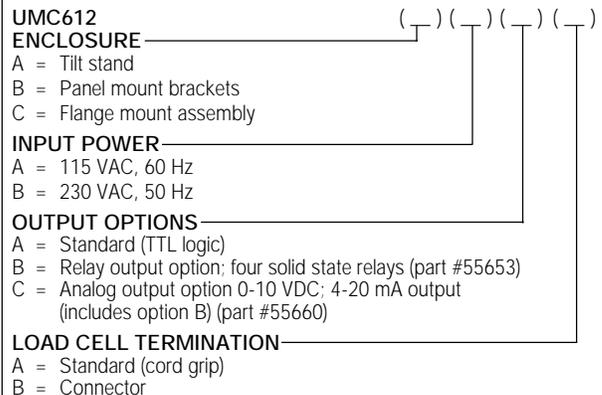

Standard Features

- Bi-polar resolution up to 1,000,000 counts
- EMI/RFI shielding
- Dual serial ports
- Time and date
- NEMA 4X stainless steel
- Multi-line display, six digits for weight and 16 alpha-numeric for process status information
- Digital and selective 2Hz analog filtering
- Active temperature compensation for zero and span
- Automatic gain adjustment
- Selectable conversion rate
- 10-point linearity compensation
- Automatic dead load compensation
- Rate-by-weight and peak hold
- Eight setpoint outputs and four process inputs
- Programmable batch sequence and print format
- Multi-ingredient accumulation
- Full serial control with 20mA, RS-232, RS-422 or RS-485

Options/Accessories

- 55653 Relay board with four solid state relays (new-stlye), KBT7116-16

PART #	DESCRIPTION
19191	IQ 700HB LED display, 115 VAC
34752	IQ 700HB LED display, 230 VAC

The IQ 700HB is an AC-powered indicator with a bright LED display and is part of our board-compatible series of indicators and scales. It is designed for general weighing and truck scale applications.

The IQ 700HB features a 300-truck ID memory and versatile setpoint capabilities as standard equipment. These improved software capabilities give the IQ 700HB the flexibility to monitor truck IN/OUT operations or control various process control operations like filling and checkweighing. Other standard features include dual serial ports (one bidirectional), gross/tare/net printout, power for eight 350-ohm load cells, and two programmable setpoints. Its NEMA 4X stainless steel enclosure protects electronics in demanding environments.

Applications

- Truck scales
- Industrial weighing
- Filling and checkweighing

Standard Features

- Bright Light Emitting Diode (LED) display
- AC power
- Stainless steel NEMA 4X enclosure
- Front-panel digital calibration
- Automatic zero and span temperature compensation
- Excitation for eight 350Ω load cells at 10 VDC
- Two fully programmable setpoints with "Zero Band"
- Two serial ports offering bidirectional RS-232 and simplex RS-232 or 20 mA current loop
- Gross/Tare/Net computation
- Time and date
- Accumulator
- 300-truck ID memory
- Versatile tilt stand
- Set-up parameters printout

SURVIVOR[®] 555HE

Hostile Environment Digital Weight Indicator

PART #	DESCRIPTION
19156	SURVIVOR 555HE

The SURVIVOR 555HE is a rugged industrial instrument that combines the features of the UMC555 with our environmentally protected SURVIVOR package. It's designed and proven to withstand some of the most hostile environments in the field.

The SURVIVOR 555HE is equipped with temperature compensation and RFI/EMI filtering to ensure peak performance in demanding applications. The advanced communications provide "real time" data generation in industrial environments.

For added flexibility, the SURVIVOR 555HE can be operated from an external DC power source.

Applications

- Straight weighing
- Corrosive environments
- Harsh washdown

Standard Features

- NEMA 4X Fiberglass-Reinforced Polyester (FRP) enclosure
- Rubber-booted SURVIVOR watertight switches
- Nylon watertight cable fittings
- High visibility, bright red 0.8" (20.3mm) Light Emitting Diode (LED) display
- Full digital front-panel calibration
- Excitation for eight 350Ω cells
- Full RFI/EMI filtering
- Two serial ports offering bidirectional RS-232 and simplex RS-232 or 20 mA current loop
- 115 VAC, 230 VAC available

Options/Accessories

- 19298 Internal thermostatically-controlled heater, maintains inner unit temperature to within recommended operating specifications
- 19576 BCD output
- 19341 Battery option
- 19578 Analog output, 0-10 VDC/4-20 mA
- 16819 Additional operating manual

LOAD CELL EXCITATION:

10 VDC, fixed, short-circuit proof

LOAD CELL CURRENT:

IQ plus 810SS
stainless steel

The IQ plus 810... never before has this level of power been available in a digital weight indicator. Its unique hybrid digital circuitry provides faster, more accurate and more flexible performance than conventional technology. It provides power for 16 350-ohm load cells on up to four separate scales, simplifying multi-scale control*. For use in hostile environments, the NEMA 4X FRP SURVIVOR enclosure ensures superior corrosion and condensation protection, inside or outside. The IQ plus 810SS NEMA 4X stainless steel is also available. The bright blue/green display is unmistakable even in poor visibility conditions. An optional LED bar graph enhances software capabilities and interactive operation.

The IQ plus 810 offers six different operating selections for truck scale management. The large internal memory holds up to 200 six-digit ID numbers and truck tares. Selectable automatic ticket printing and traffic reporting eliminate the need for a scale house computer.

Our exclusive RATTLETRAP® vibration control eliminates interference from agitators, mixers, blenders, fork truck traffic and other sources of industrial environment vibration. Now you can achieve stable, accurate weight information regardless of motion on or around your scale.

The IQ plus 810 is a batching Automation Control Center™. Its unique programmable setpoint software contains a comprehensive array of batch process possibilities. It's even self-correcting, learning as it works to assure your process integrity. The standard configuration includes 20 setpoint steps, 4 digital outputs and 3 digital inputs, providing more basic power than many custom controllers. With the addition of JetPak™, weigh data processing is performed at least five times faster than with conventional meters. At an impressive rate of 100 updates per second, it's ideal for high-speed bag filling, checkweighing and multi-step batching operations. An array of additional hardware and software options offer virtually unlimited solutions for your complex operations.

Applications

- Multi-scale operation, up to four scales*
- Sophisticated batching systems
- Outdoor and corrosive environments
- Perishable goods industry
- High-speed bag filling and checkweighing*

Standard Features

- NEMA 4X Fiberglass-Reinforced Polyester (FRP) wall mount enclosure/NEMA 4X stainless steel wall mount enclosure
- Rubber-booted SURVIVOR watertight switches (IQ plus 810HE)
- Bright, bold Vacuum Fluorescent Display (VFD)
- Full keyboard for setpoint or fixed tare entry
- Time and date
- 20 updates/second, nominal
- Advanced digital filtering and RATTLETRAP® vibration control
- 20 programmable setpoint steps
- Multi-channel accumulators
- 3 digital inputs, TTL or hard contact closure; 4 TTL digital outputs, expandable to 16
- Multi-functional 200 ID Truck in/out program
- Selectable print data and format via EDP port or front panel
- 2 communication ports: (1) EDP port, full duplex RS-232 or 20 mA optional; (1) printer port, simplex RS-232/20 mA current loop
- Multi-scale control expandable to 4 scale inputs, with individual scale setup*
- Power for up to sixteen 350Ω load cells on single or multiple channels*
- Models with JetPak feature 100 Hz A/D for 100 updates per second, single channel unit*

PART #	DESCRIPTION
35826	115 VAC SURVIVOR 320HE
35827	230 VAC SURVIVOR 320HE

From fertilizer and chemical scales to corrosive washdown environments, the SURVIVOR 320HE and SURVIVOR 390HE indicators provide the ideal solution for severe-duty industrial and agricultural applications.

In bright sunlight or black of night, the SURVIVOR 320HE can be read from up to 40 feet away! Remote key operation, selective switch disabling, and switch lockout limit operator access to only the controls required to run their operation, reducing costly errors.

The SURVIVOR 320HE and SURVIVOR 390HE have unparalleled response time from actual scale loading to display update. RATTLETRAP® vibration filtering makes this one of the most advanced special-purpose weight indicators available today.

A serial port drives printers, remote displays, computers, or other devices. A remote print key or serial print command allows printing from a remote print station, programmable controller, or host computer.

Applications

- Straight weighing
- Corrosive environments
- Oil refineries
- Chemical processing plants
- Wastewater treatment
- Agricultural applications

Standard Features

- NEMA 4X Fiberglass-Reinforced Polyester (FRP) enclosure
- (320HE) Bright, bold backlit 2" Liquid Crystal Display (LCD)
- (390HE) Bright, bold 1" Liquid Crystal Display (LCD)
- Universal mounting tabs (replaceable)
- 50 updates/second typical (320HE)
- 30, 15, 7 1/2, 3 3/4 updates/second (390HE)
- Selectable display update rate
- lb/kg switching
- 5-button operation
- Selectable units
- One communication port, simplex, selectable RS-232 or 20 mA current loop
- RATTLETRAP® vibration control

35986 CW-80 Indicator, 230 VAC w/BBU and N/O relays
35987 CW-80 Indicator, 230 VAC w/BBU and N/C relays

Offered as a SURVIVOR CW-80 checkweigher indicator only, the SURVIVOR CW-80 indicator offers adaptability to a wider variety of applications than the standard SURVIVOR CW-80 packages.

The SURVIVOR CW-80 features a new generation **Tough-Touch**[™] keypad, designed to withstand the most demanding industrial applications. International symbols and an extra-bright, rapid-response display make the CW-80 instantly readable in almost any environment. A true NEMA 4X/IP66 indicator enclosure is designed to seal out moisture and contaminants.

115/230 power configurations and optional DC battery "backup power," with one of three available outputs, make operation possible anywhere. Battery backup power eliminates down time due to power failure, and supports limited portability. Optional RS-485 communication enables interfacing to a computer network, while the transaction memory buffer saves the last weighments for network retrieval and analysis. This unit powers four 350-ohm load cells.

Applications

- Food processing
- Industrial processing
- Kit assembly operations
- General filling operations
- General purpose weighing

Standard Features

- Large, bold 0.8" (20.3mm) Light Emitting Diode (LED) rapid-response display
- Industrial-quality 304 stainless steel construction
- NEMA 4X/IP66 indicator enclosure
- **Tough-Touch**[™] industrial touch-control front panel with keys for over, under, tare, zero, units, print, target and ID
- Front-panel "Independent Key Disabling" for: OVER, UNDER, TARE, PRINT and UNITS keys
- Displays units in decimal lb, kg, oz, lb & oz, grams
- Annunciator lights for unit selection
- High-intensity LED for over, under and accept
- Storage for up to 300 tare and tolerance settings
- Automatic zero tracking
- 115 VAC or 230 VAC operation
- Bidirectional RS-232 and/or simplex 20 mA current loop communication
- RATTLETRAP[®] advanced digital filtering
- Combination desk/wall mount bracket
- Power for up to four 350-ohm load cells

The RD-300 Remote Display is designed for rugged reliability and versatility in demanding industrial, chemical and agricultural weighing environments.

Its compact NEMA 4X Fiberglass-Reinforced Polyester (FRP) enclosure is ideally suited for indoor and outdoor applications exposed to corrosive and caustic elements. An optional stainless steel enclosure provides solid washdown protection in food processing environments. Even in direct sunlight, its high-contrast liquid crystal display maximizes operator viewing. A display backlight option provides quick and accurate weight readings in dark conditions.

Standard RS-232 and 20mA current loop communications allow interfacing to host computers and digital weighing indicators. A unique universal data receiver provides compatibility with a wide variety of indicators by intuitively recognizing serial string formats.

Applications

- Indoor/outdoor use
- Washdown
- Bright sunlight and dark environments

Standard Features

- NEMA 4X Fiberglass-Reinforced Polyester (FRP) wall mount enclosure
- Easily-readable 1" (25.4mm) Liquid Crystal Display (LCD)
- RS-232 and 20 mA active current loop interface
- Status annunciators
- AC or DC operation
- Optional NEMA 4X stainless steel wall mount enclosure
- Optional display with backlight for dark conditions
- Compatible with a variety of digital weighing indicators; intuitive data receiver automatically interprets serial strings
- 115 VAC, 230 VAC available

Options/Accessories

- 32724 RD-300 AC/DC board only
- 32725 RD-300 AC/DC board only w/backlight

PART #	DESCRIPTION
32716	RD-232, 115 VAC/12 VDC, FRP enclosure
32717	RD-232, 115 VAC/12 VDC, stainless steel enclosure
32727	RD-232, 115 VAC/12 VDC, panel mount
34748	RD-232, 230 VAC/12 VDC, FRP enclosure

Featuring a NEMA 4X Fiberglass-Reinforced Polyester (FRP) enclosure, the RD-232 remote display is built to withstand the rigors of harsh treatment in wet and corrosive environments.

With a highly-visible .8" LED display and its full array of features, including a range of selectable interfaces, selectable baud rates, and annunciators, the RD-232 is ideal for truck, chemical, agricultural and paper applications. In food processing environments, the optional stainless steel enclosure provides maximum protection. A panel-mount version is also available.

Standard RS-232 or 20 mA current loop allows interfacing to a range of host devices. In applications requiring cable lengths in excess of 500 feet, the RD-232 actually pays for itself in cable savings when compared to parallel displays. Installation of the RD-232 is easy, requiring only two wire connections and a 115 VAC outlet or 12 VDC power supply.

Applications

- Hostile washdown applications
- Corrosive environments
- Harsh industrial areas
- Wet and humid areas
- Indoor/outdoor use

Standard Features

- NEMA 4X Fiberglass-Reinforced Polyester (FRP) wall-mount enclosure
- Easy-to-read 6-digit 0.8" (20.3mm) Light Emitting Diode (LED)

Featuring a unique 44-segment LCD display with backlight, the new SURVIVOR IQ L-Series provides incredibly bright alphanumeric prompts for accurate readings indoors. What's more, its 2" or 3" digit sizes and bright LED annunciators are easily read from long distances or in dimly-lit environments.

Encased in a durable NEMA 4 enclosure, the SURVIVOR IQ L-Series delivers maximum protection from the worst abuse. Additionally, a free-floating decimal point provides the versatility needed for a wide range of industrial applications.

Utilizing the advanced AutoLink™ software feature, the SURVIVOR IQ L-Series practically installs itself! Simply plug in the communications cable between the indicator and remote display, and the IQ L-Series automatically determines the data rate and format used by the indicator.
