

# SURVIVOR®

## ATV SERIES

### ALL-TERRAIN PORTABLE VEHICLE SCALE

# Built to take it. Anywhere.

#### Top access to all electronics

*Electronic components are easily accessible through the scale deck, allowing for easy maintenance even when space is limited.*

#### Patented G-Force™ mounting system

*Highly accurate self-checking design controls loading forces and extends component life.*

#### Heavy-duty sub-frame

*Designed to maximize performance and durability in tough applications, the ATV's ultra heavy-duty frame offers exceptional floatation and stability.*

### Rock-Solid Portable Vehicle Weighing

For the ultimate in fully-electronic weighing anywhere you need it, Rice Lake Weighing Systems introduces the ATV portable.

Built from the ground up for years of trouble-free performance, the ATV is designed for heavy-duty weighing in quarries, asphalt plants, timber operations, road construction, or virtually anywhere a permanent scale installation isn't practical.

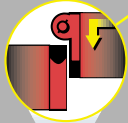

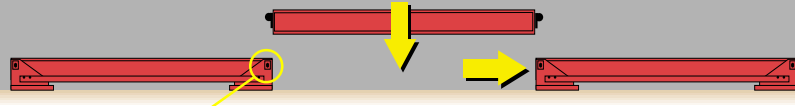

You'll be amazed at how easily the factory-wired self-contained modules connect with our unique self-seating joint system. Simply assemble the modules on compacted gravel or concrete, and you'll be weighing in just a few hours.

Beneath convenient top access plates lies the high-performance engine of the ATV—our patented G-Force™ mounting system. This exclusive design controls even the most violent loading forces and eliminates unnecessary movement during weighing operations—dramatically reducing stress and wear on mount assemblies and all moving parts.

Real-world advantages for real-world weighing. The SURVIVOR® ATV is built to take it... anywhere.

**RICE LAKE WEIGHING SYSTEMS**

Industrial Solutions on a Global Scale®

Versatile and cost-effective, the ATV was designed to change with your business. Self-contained live modules and floating center modules make it easy to add or remove sections to fit application requirements.

Self-seating hinge connectors offer easy installation and incredibly strong joints.

**Exclusive lock-out system allows transportation without fear of load cell damage.**

The ATV incorporates a transport feature that removes all weight from the load cells, suspending the deck free of the links to avoid damage to electronics while moving the scale.

**ATV Portable Specifications / Dimensions:**

Dimensions	Full Scale Capacity	Model Number	Modules	Load Cells	CLC Rating
20 ft x 10-11-12 ft	60 tons	EZ20(10,11,12)-60-ATV	1	4	30 tons
24 ft x 10-11-12 ft	60 tons	EZ24(10,11,12)-60-ATV	1	4	30 tons
40 ft x 10-11-12 ft	60 tons	EZ40(10,11,12)-60-ATV	2	8	30 tons
47 ft x 10-11-12 ft	60 tons	EZ47(10,11,12)-60-ATV	2	8	30 tons
60 ft x 10-11-12 ft	100 tons	EZ60(10,11,12)-100-ATV	3	8	30 tons
70 ft x 10-11-12 ft	100 tons	EZ70(10,11,12)-100-ATV	3	8	30 tons

**Backfill Ramp Bulkheads**

Standard bulkheads are heavily braced for high-compression backfilling with gravel or aggregate. If backfilled ramps aren't appropriate for the application, choose from optional steel ramps or customized modules for concrete approaches.

**Guiderails (optional)**

Heavy-duty rail system offers a strong, attractive barrier against accidental drive-offs. Offset tube design allows full use of weighing surface and minimizes damage to truck wheels when contact occurs.

\* ATV weighbridges are warranted against defects in materials and workmanship for a period of 5 years from delivery.

**Standard Features:**

- 10, 11, & 12 ft. NTEP certified standard widths
- Lengths from 10 ft. through 120 ft.
- 75,000 lb capacity load cells and pre-assembled G-Force™ mounts
- Up to 200,000 lb full scale capacity
- 5 year weighbridge warranty\*

**Options/Accessories:**

- Guiderails
- Lightning protection package
- Peripheral equipment (below)
