

Electronic Balance Calibration Weights

Electronic balance calibration weights are high-precision solid stainless steel weights, developed specifically for the calibration and adjustment of electronic balances and scales. All are manufactured and calibrated to ASTM E 617-97 specifications and tolerances for classes 2, 3 and 4.

These weights have a stackable design and include a glove for easy handling. They also have a highly buffed satin-finished surface. Cases are included on all non-grip handle weights. Traceable and Weight Calibration Certificates are also available at an additional charge.

If you are in need of a unique weight, for example, an unusual tolerance, material or shape, we will be happy to assist you. Please call us at 1-800-357-8627 for pricing and additional information.

Avoirdupois Cylindrical Weight Sets/Class F

These are precision cylindrical stainless steel test weights for testing and adjusting commercial or other scales. All are made in stringent compliance with the National Institute of Standards and Technology Class F tolerances and specifications listed in NIST Handbook 105-1. Traceable and Weight Calibration Certificates are available at an additional cost.

If you are in need of a unique weight, for example, an unusual tolerance, shape or material, we will be happy to assist you. Please call us at 1-800-357-8627 (TMAP) for pricing or additional information.
