Service, Applications, & Support...

“We service what we sell!”

A Service Commitment You Can Trust...

We understand that downtime can be catastrophic. Our service organization operates not as a profit center, but as a service provider with the primary purpose of getting the customer back online as quickly as possible. We are a pioneer in the development of services that make life easier for our customers.

As technology races ahead, service providers must stay even farther ahead to be able to identify and correct problems. You have our sincere commitment to do just that.

We make It Our Business To Understand Yours...

Since 1946, we've dedicated ourselves to constantly improving our products and services in accordance with our customers' changing needs. Our roots as a scale distributor taught us that the heart of the independent scale company is its service base, and we provide the most comprehensive distributor support in the business.

- **The Right Equipment**

We maintain continuing investments in new technology to meet or exceed all equipment testing requirements.

- **Trained Technicians**

Training for our Repair Department technicians includes periodic on-the-job field experience with our own customers. On the test truck, in the factory or in the shop, our technicians thoroughly understand the “real world” of industrial scales.

- **We're Here When You Need Us**

Our Service Department is available Monday through Friday from 6:30 A.M. to 6:30 P.M., and Saturday from 8:00 A.M. to noon, Central Time.

- **Global Service Network**

To serve you better, we are certified by a number of manufacturers as a product service center. We are manufacturer-trained and authorized to provide fast warranty evaluation and repair for many internationally-recognized brands.
