2006 Parts Price Book

A new Parts Price Book will be available in March and will be announced on a separate bulletin.

A price increase on parts will go into effect March 1, 2006. Order now to avoid the increase! We will not honor any old pricing after February 28, 2006.

As always, you can view the most current pricing on www.mtparts.com. The web site always contains the most current price; even more current than the price book.

Prices have been kept flat on:

- Most Load Cells
- Current model PCBs
- Test Weights

All other items have increased approximately 4%.
