

DEPARTMENT OF TRADE AND COMMERCE STANDARDS BRANCH

S.MA-23 Revision 2

ottawa November 4, 1966.

APPROVED: TOLEDO CO FOTING COUNTEST SAME CHANDLAN 70, Nodels 1100 and 1110

manufactured by Toledo Boalo Sompany of Banada Mimited, 2462 Howard Avenue, Windsor, Ontario.

Apparatus Listed: Computing counter scale with Duplex Indication, models 1100 (horizontal indication), 1110 (angle indication),

Rating of Apparatus: 10 lb., 15 lb., 18 lb., 24 lb., and 30 lb., dependent on the

Application: For weighing commodities in retail trade.

Description: These levices are counter computing cylindrical chart type scales with balancing torque supplied by double pendulums. The platform has four point support, and motion is transmitted to the chart cylinder by a rack and pinion. An oil type dash-pot provides damping and ensures rapid readings. Level indication is provided in the base of the scale at the extreme front. Zero adjustement is effected by means of a balance weight and screw combination. The chart indication on the wendor's side is viewed through magnifying lenses set in four apertures; parallax errors are minimized by the depth of these apertures, which ensure automatic alignment of chart and indicator by the observer. On the customer's side, an aperture is provided through which weight indications may be observed.

Testing: The standard tests for a counter computing scale shall apply.
