

COUNT-100 & COUNT-200 Heavy-Duty Label Counting Stations

The **PC-1 Pre-set Label Counter** is a popular option on our **S-100 and S-200 Label Slitters**. Many times, however, users just want to count labels but don't need to slit them. Now, to save users money, LABELMATE is introducing two Label Counting Stations based on the **S-100** and **S-200** Slitter chasses but without the Slitter function. The new **COUNT-100** and **COUNT-200** Stations will handle label webs up to 6.5- and 9.5-inches wide respectively. A **CAT-2 Rewinder** pulls the label web through the counter. The versatile new **COUNT-100** and **COUNT-200** Stations can be used at the output of a printer, or can be used with an Unwinder and a **CAT-2 Rewinder** to form a stand-alone off-line label inspection / counting station.

Model COUNT-100 Label Counting Station for webs up to 6.5". COUNT-200 has similar appearance, handles label webs up to 9.5" wide.

Using LABELMATE's **PC-1 Pre-set Counter**, the **COUNT-100** and **COUNT-200** Stations can either count up or count down from a preset count to zero. If desired, when the pre-set count is reached, the **COUNT-100** and **COUNT-200** Stations can send a "HALT" signal to the **CAT-2 Rewinder**, causing it to stop.

The Counter has lots of versatility. For example, if you want to count labels that are 3-up on your label web, you can set the Counter scaling factor to three and it will read out the actual number of labels that have passed the sensor. The sensor itself is a state-of-the-art infra-red transmissive device that shines through the label web and detects the gap between successive labels. There is a sensitivity control to adjust for different kinds of label webs.

The **COUNT-100** and **COUNT-200** Stations are reasonably priced saving hundreds compared to purchasing a complete Slitting Station with Counter. Quality and reliability are cornerstones of the LABELMATE Product Line. Rugged, heavy-gauge welded steel construction and precision parts yield a product of the highest quality. LABELMATE Products are trouble-free and covered by our famous **3-Year Parts and Labor Limited Warranty**, by far the longest in the industry.

Put a LABELMATE Heavy-Duty **Label Counting Station** to work for you, today! If you need to do slitting, be sure to check out the new **SLIT-100** and **SLIT-200** Complete **Off-Line Slitting Stations** that are also available with the label counting function described here.
