PCTools™

PCTools—software that provides a way to interface a PC to the IND310drive to setup the terminal as well as download and upload database and configuration information. Refer to the Technical Manual for additional information on PCTools.

The IND310 version 2.5 comes with PCTools v2.5. All previous versions of PCTools should be removed from your PC and PCTools v2.5 installed. PCTools v2.5 will install two icons on the PC desktop: PCTools 2.02 and PCTools 2.5. You should use the PCTools 2.02 to backup information from IND310 units with software version 2.02 or earlier. PCTools 2.5 is only compatible with the IND310 version 2.5, but is able to read the configuration and database files from PCTools 2.02.

Upgrading an IND310 from version 2.02 or earlier to version 2.5 requires the following steps:

1. Use PCTools 2.02 to download Configuration and required data tables. See remainder of this appendix for details on how to download information with PCTools.
2. Reboot the IND310.
3. Place the IND310 version 2.5 software "sabre.tar" as well as the file "tar" on the USB stick (71208113).
4. Use the USB stick to download version 2.5 software into the IND310. See section regarding Updating Software.
5. Use PCTools 2.5 to upload the configuration and required data tables to the IND310. See the Technical Manual for details on how to upload information with PCTools.
6. Reboot the IND310.
