

Technical Bulletin

Please Distribute to all Sales and Service Personnel

Mettler-Toledo, Inc. Scales & Systems

Number: R-2-99

Date: 3-2-99

Model: SmartTouch® Masters

**Subject: New Software, V4.1 (A154240R) and Frequent Shopper,
V1.1(A153305R)**

Starting with date code AA (January 1999), all SmartTouch® masters are shipped with new software. They will have either standard software V4.1 (A154240R) or frequent shopper software V1.1 (A153305R).

New Features

- Security label field in the PLU file. This field controls whether the 702 applies a label for a given PLU (satellite software security setpoint must be set). It toggles, YES/NO, when it is touched.

Databack, Intellinet/ScaleVision Compatibility

- Databack

PLU's - The changes to the PLU file for security label are forward and backward compatible
ET/NF/GR/Action etc - No changes made to these.

- Intellinet/ScaleVision

PLU files - The changes are transparent to both Intellinet and ScaleVision. and the
Security label field can not be viewed or edited. The change can only be made in the
Master Editor of the Scale.

Cutting Tests - Now compatible with Costco's proprietary software for their 20 cutting tests.

Bug Fixes

Costco cutting test - host commands were corrected to work properly with their proprietary software

Y2K - any pending PLU due to activate on or after Jan 1, 2000 would activate at the top of the next hour after it was received. This is true whether it was created before or after Jan 1, 2000.
