

# Technical Bulletin

Please Distribute to all Sales and Service Personnel

**Mettler-Toledo, Inc.**  
**Scales & Systems**

**Number:** MTFW-08-00  
**Date:** 04-12-00  
**Model:** 702  
**Subject:** 702 Service Upgrades

---

An upgrade KOP is available for the 702 Bottom Label Applicator. This KOP is designed to improve label delivery, eliminate small packages from getting hung up in the discharge end of the unit and eliminate stray labels from getting caught up in the conveyor assembly. Most of the distributors and service offices with 702's in their service areas have been contacted and received these service KOP's. If you have any 702 Bottom Label Applicators in your service area and have not received the service upgrade, contact Russ Wagner at Mettler Toledo (262-835-4411) . Email: [russ.wagner@mt.com](mailto:russ.wagner@mt.com)
