Number: MTFW-19-00
Date: 07-24-00
Model: 702
Subject: Label Guide Thumbscrews

On 702 Bottom Label Applicators beginning with S/N 3091286-3FB, the 3 phillips head screws that fasten the label guides have been replaced with thumb screws. This allows the operator to remove the label guides for cleaning without the use of a screwdriver.

These thumbscrews can be used on older 702 Bottom Label Applicators as well. To add this enhancement to existing 702's order 3 of part #83144600A and install them in the locations shown in the photograph below.

Thumbscrews
