Number: MTFW-24-00
Date: 11-02-00
Model: 317
Subject: Label Ski Bracket

The applicator ski bracket has been changed on both the Price and Dayglo applicator printers. The bracket is now being made out of 14 gauge material for greater rigidity. Because of the change in thickness, the label ski adjustment plate also had to be modified to allow for free movement of the bracket. These changes were put into production on 317-2001 Price applicator printers beginning with S/N 3090987-3FB and 317-3001 Dayglo applicator printers beginning with S/N 3091628-3GB.

The new part numbers are:

B82772600A Applicator Ski Assembly – Standard
C82840200A Applicator Ski Assembly – Dayglo

If service parts are required for printers built prior to this change a new label ski adjustment plate P/N 83058400A will also be needed.
