Number: MTFW-25-00
Date: 11-09-00
Model: 645
Subject: Center Clamp Pusher

A new wide package pusher P/N 83022400A has been developed for use on all 645 Wrappers. The new pusher disperses the pressure against the tray over a wider area. This will decrease the deflection on the sides of some of the weaker trays improving the wrap quality. All 645 Wrappers beginning with S/N 3092580-3KB include this new package pusher.

The current pusher plates P/N 82928000A and P/N 82734800A and pusher pad P/N 82734900A are discontinued. When servicing any of these part numbers use the new package pusher P/N 83022400A. Make note in your 645 Plus and 645 XL parts manuals of this change.
