Number: MTFW-26-00
Date: 11-09-00
Model: 645 Plus
Subject: Film & Package Drive Rollers

Since the implementation of the clutched package drive roller and polished film drive roller design on the 645 Plus wrappers, there have been issues with short overwrap on the packages. Because of this, these parts have been changed back to the previous design. 645 Plus Wrappers beginning with S/N 3092783-3KB are built with a solid (not clutched) package drive roller and a film drive roller incorporating a plastic insert.

The clutched package drive roller and polished film drive roller are discontinued.

Include the following parts numbers in your 645 Plus Parts Manual:

B82746200A	Film Drive Roller
B82746000A	Package Drive Roller
