METTLER TOLEDO

# Have Accurate Vehicle Transaction Data at Your Fingertips

**METTLER TOLEDO** understands you have to keep vehicles moving and gather pertinent data in the process. Our WinBridge software package does just that. And, because your business is changing, your vehicle scale software needs change also.

## Comparison Chart

Imports/exports data	✓	✓	✓	✓
Automatic backup of database	✓	✓	✓	manual
Calculates pricing	✓	✓	✓	✓
Advanced pricing formulas			✓	
Adds surcharges to pricing			✓	✓
Virtual indicator for summing weights			✓	
Product sampling schedules			✓	
Groups and group presets			✓	
Configurable screens	✓	✓	✓	

Our WinBridge Professional software is a step-up product that has all the features of the standard software plus more. It is easily configurable and has a wide range of options that can be incorporated. As your business requirements grow, the WinBridge Professional program makes transaction data collection easier. WinBridge Professional software is network ready, so you can have multiple users sourcing the same database.

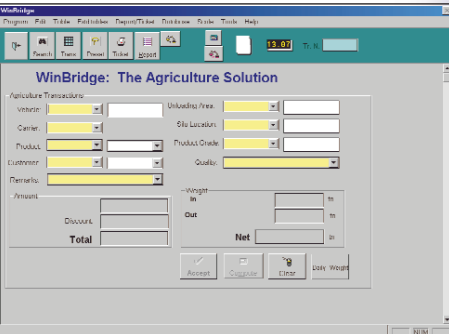

WinBridge Advanced software is our top-of-the-line software package. It also is easily configurable and has even more options. It is the perfect program for the management of complex transaction activities. With the WinBridge Advanced program, we provide industry-specific software that has designed screens, reports and tickets specific to your industry and the way you do business. We offer industry-specific packages for the aggregate, agricultural, forestry, and waste and recycling industries.

For a quick reference to the features included in each software package please refer to the comparison chart on this page.

At METTLER TOLEDO we recognize this and have designed a three-tiered software approach to accommodate these changes: WinBridge Standard, WinBridge Professional and WinBridge Advanced.

Our WinBridge Standard package is for a smaller operation that is looking for a cost-effective way to start managing the vehicle scale transaction information. WinBridge Standard program is simple and easy to use. The basic screen requires no configuration. It's easy to install so you can have it up and running in no time.

## WinBridge Sample Screens

### WinBridge Offers Unique Features to Keep Your Business Moving

- Configurable screens can be customized to meet your simple or complex application requirements.
- SQL relational database can give you a live link to MS ACCESS® and other ODBC compliant tools.
- User profiles let you define up to ten levels of authorization for supervisors and operators.
- Preset operations allow you to predefine transaction entries. Automatic backup, exporting, and purging functions minimize the possibility of losing data.
- Twelve standard tables manage your most valuable data: Company, Product, Customer, Contact, Carrier, Vehicle, Container, Operator, Tax, Tare, Remark 1 and Remark 2

And, 15 additional tables are available with WinBridge Advanced software to manage more complex data management systems.

#### **Add-on Report Writer Allows for Customization**

The Report Writer add-on module is available for all versions of WinBridge programs to allow you to create your own custom reports. Outstanding formatting capabilities let you choose the information you want, the position of the information and even the size of the type you use. It also allows for the insertion of text, graphics and more.

#### **Add-on Unattended Module**

The Unattended Weighing add-on module is available on the Professional and the Advanced versions of WinBridge programs.

It requires no operator, allowing smooth continuous operation twenty-four hours a day, seven days a week.

#### **Networking**

WinBridge network allows multiple users to access the same database, minimizing duplication and errors, and increasing system management flexibility.

WinBridge software is ideal for virtually any application, such as quarries, forestry, grain elevators, waste management, recycling centers, chemical plants and more. It combines the high reliability of a standard solution with the greatest possible flexibility to meet the specific needs of your business.

In addition to our WinBridge software, METTLER TOLEDO offers the most comprehensive line of vehicle scales in the industry. Equipped with highly accurate and exclusive DigiTOL® POWERCELL® load cells or MTX® brand load cells, our vehicle scales provide the most reliable and durable service in the business.

When you need fast service, and who doesn't these days, it helps to have a problem-solver nearby. With METTLER TOLEDO's network of certified and trained representatives, one is never far away. And, no one is more qualified, anywhere, to meet your needs.

### Minimum Specifications

#### Personal Computer Hardware

Pentium®/133 MHz CPU

- CD-ROM Player
- 1 GB Hard Drive
- 32 MB RAM
- 5 MB Disk Space
- 15" Monitor recommended (17" Monitor is better to reduce user eye strain)
- Parallel Printer (for printing reports and tickets)

#### Software

Windows 95, 98 or NT

#### Indicator

Numerous Indicators: LYNX®, COUGAR®, JAGUAR® and many other competitors. Requires a serial port.

### ISO 9001

This product was developed, produced and tested in a METTLER TOLEDO facility that has been audited and registered according to international (ISO 9001) quality standards.

**CTEP**  
Certified

**CE**

### Global Scope

WinBridge is designed for local use no matter where you are in the world. It's supported by our global network of sales and service representatives.
