	WADUENG: This program is protected by copyright law and international treaties.
	bailtati A state
E. C. Star	Next > Cancel

Explore. Then double-click on the CD or DVD ROM drive. Double-click on Setup.exe.

- 2. Follow the instructions to install the software. By default, it will be installed to \Program Files\USB Electronic Scale.
- Shortcuts will be created on the desktop and startup menu: Start > Programs > USB Electronic Scale > USB Electronic Scale. You can start using the USB Electronic Scale by clicking the shortcut icon.

5

uninstall procedure

Using the CD ROM

- 1. Run Setup.exe found in the root
- folder of the supplied CD-ROM.
- 2. Select "Remove" to uninstall
- USB Electronic Scale.
- Go to your Start Menu and select Settings < Control Panel < Add or Remove Programs.
 Select USB Electronic Scale, then click the Remove button.

Using Your Control Panel

using the scale

STATE REPORT

Attach your scale to the computer's USB port and run the supplied software.

The software runs at Windows startup by default. You can also start it by clicking the shortcut. To change the startup, do the following:

1. Right click the System Tray icon and choose Options.

Check of uncheck the Run at Windows startup to change the startup with Windows option

When the USB Electronic Scale software starts, it program icon will appear in the Windows System Tray to Indicate the connection status of the scale. Right click the scale icon to see a menu of your options.

The software displays the reading of the scale and lets you control your scale.

RadioShack

scale display

The Scale Display shows the reading of the USB Electronic Scale. To bring out the display, do one of the following:

Using the System Tray Icon	Using the Normal Display
Right click the System Tray icon and cheose Launch USB Electronic Scale.	Double click the System Tray icon.

To minimize the display, do one of the following:

Using the System Tray Icon	Using the Normal Display
Right click System Tray icon and choose Minimize USB Electronic Scale .	Click the Minimize button on the Normal Display.
free and the second sec	4453

normal display and small display

There are two display options for the Scale Display: Normal Display and Small Display. Normal Display looks like a scale and has a panel showing the scale reading. Use the buttons on either side of the display to perform scale functions. The Small Display only shows the scale reading.

To switch between the two display modes, right click the System Tray icon and select **Small Display**. Check to use the Small Display and uncheck to show the Normal Display.

To set the Scale display to always be on top of the other windows, right click the System Tray icon and choose **Always on Top**.

change the scale display color

Customize the color of your scale.

- 1. Right click the System Tray icon and choose Options.
- 2. Click on the Scale Color tab and choose the color of the scale.
- 3. Click OK.

7

operating the scale

After the USB Electronic Scale software has started, it takes about 6 seconds to initialize the Electronic Scale. During the initialization, the System Tray icon flashes. The scale software performs the initialization at program startup and every time the scale is attached to the USB port of the computer.

The scale will automatically reset to zero at startup, so do not place anything you want to weigh on the scale during startup.

After initialization, you can use the scale to weigh things. The weight capacity for the scale is 10lb or 5kg. The resolution is 0.1oz and 1g, respectively.

DO NOT exceed the weight capacity of your scale. NOTE> If you do, it may damage the scale sensor and cause permanent damage to the scale.

To use the scale, do one of the following:

Using the System Tray Icon	Using the Normal Display	
Right-click on the System Tray icon and select one of the options.	Click the buttons on the Scale Display in Normal Display mode.	

weigh an item

- 1. Connect the scale to the computer's USB port.
- 2. Start the software and wait for initialization to finish.
- 3. Place the item you want to weigh on the scale platform.
- 4. Make sure you distribute the weight of the package evenly over the platform. Always line up the center of gravity of each package with the center of the scale. Avoid tipping packages in any direction.

tare

If you need to weigh several loose items, it may be helpful to place those items in a container (not included). Since you might not be shipping that container, place the container on

RadioShack.

the scale first. Then you can tare the scale (deduct the weight of your container). Now, when you place the items you want to weigh inside the container, the reading on the scale will reflect only the weight of those items.

To tare the scale and set the current reading to zero, do one of the following:

Using the System Tray Icon	Using the Normal Display	
Right-click on the System Tray icon and choose Tare Scale.	Press the Tare button on the Normal Display.	

change weight units

The application can display the weight in two formats: kgs (kilograms) and lbs (pounds). To change the weight unit, do one of the following:

Using the Sy stem Tray Icon	Using the Normal Display
 Right click System Tray icon. Highlight Unit and select kgs or lbs. 	Press KGS/LBS button on the Normal Display.

hold

To hold the current reading of the scale and discard further changes in the reading, right click the System Tray icon and choose Hold, or press the Hold button on the Normal Display.

The word HOLD will be shown on the Scale Display. Repeat the above step to disable hold.

The Tare operation will be disabled when Hold is activated.

9

he Basics

unit conversion tool

The Unit Conversion Tool allows you to convert weight from one unit to other units. It is an HTML document and works with your web browser. To start the conversion tool, do one of the following:

Using the System Tray Icon	Using the Normal Display
Right-click on the System Tray icon and select Converter.	Press the Converter button on the Normal Display.

The current scale reading will be populated in the HTML page by default when you start the tool. With the Unit Conversion tool, you can convert weight to and from any of the following units:

RadioShack

- 1. Enter the weight of the item in the text field at the top of the page.
- 2. Select its original unit of measure from the drop down list next to the weight field.
- 3. Press Convert.

If you place a new item on the scale, you must NOTE press the converter button the scale software to automatically populate the conversion web page.

The scale application includes a shortout to the Windows Calculator. You can launch the Calculator by right clicking the System Tray icon and choosing Calculator.

13

auto populate destination web fields

When you place an item on the scale, the software can automatically open your web browser and go to your favorite shipper's web page. It can populate the page with the weight information in the appropriate field after the page has finished loading. The application has eight pre-defined web pages for you to choose from. In addition to weight information, this application can populate other necessary fields for you, but you must fill them in ahead of time (See Auto Fill Web Page).

NOTE If there are any fields that you want to fill in manually, you may leave them blank.

You can tell the application to launch the selected web page and populate the information any time by doing one of the followina:

Using the System Tray Icon	Using the Normal Display
Right click the System Tray icon and choose Go to Selected Web page.	Press Auto-Launch Website button on the Normal Display.

If you have already launched the page once, only NOTE> weight information will be updated next time you press the button.

. . I

auto-launch web page

You can choose from the following eight pre-defined web pages as the destination site for auto-launch:

- UPS Rate Calculator
- USPS Domestic Rate Calculator
- USPS Business Rate Calculator .
- USPS International Envelope Rate Calculator
- USPS International Package Rate Calculator
- DHL Rates
- FedEx Rate Finder
- ٠ Ebay Seller Shipping Calculator

RadioShack.

You can add new web pages to the Auto-Launch list by using the program's Add Web Page features. Please refer to Add Web Page.

The application will not automatically launch the web page if the weight is less than 0.2oz, the change in weight is less than 0.2oz, or the browser opened by the application has not been closed.

To select the auto-launch web page, do one of the following:

Using the System Tray Icon	Using the Normal Display
 Right click the System Tray icon. Highlight Select Auto-launch Web Page. Click on your favorite shipper's web page. Select None to disable Auto-Launch. 	Go to the drop down list on the Normal Display and choose your
 Right click the System Tray icon and choose Options. Choose the web page from the Auto-Launch website drop down list. Then click OK. Select None to disable Auto-Launch. 	favorite shipper. Choose None to disable the auto-launch feature.

auto fill web page

This application includes certain items from the pre-defined web pages. If you enter the information before running the program, the software will populate the fields when the website is launched. For instance, if you always ship DHL Second Day, you may want the software to automatically make these selections for you each time you use the scale and launch that web page. The items that you can store in the application are placed under the following tabs on the Options screen:

- DHL-contains the items on the DHL Rates web page.
- Ebay—contains the items on the Ebay Seller Shipping
 Calculator.
- FedEx Rate Finder—contains the items on the first page of FedEx Rate Finder.
- UPS—contains the items on the UPS Rate Calculator.

15

- USPS Domestic—contains the items on USPS Domestic Rate Calculator.
- USPS Business—contains the items on USPS Business Rate Calculator.
- USPS International—contains the items on USPS International Envelope Rate Calculator and USPS International Package Rate Calculator.

Fill in your favorite shipping parameters here. This is particularly helpful if you always use the same type of shipping, the same size package, or even if you always ship to or from the same zip code.

If there are any fields you wish to fill in manually, leave them blank at this time.

NOTE: Websites are subject to change without warning.

To set the page to fill automatically when Auto-Launch is selected, do the following:

- 1. Right click System Tray icon and choose Options.
- Choose the tab corresponding to the name of your favorite shipping company.
- 3. Check Auto Fill.

RadioShack

Fill in the information.

5. Click OK.

If you do not want the software to automatically fill any of the web pages, uncheck **Auto Fill** in the corresponding tab in **Options**. The application will just launch the page and populate the weight information without automatically filling in the rest of the information on that shipper's web page.

For the **FedEx Rate Finder** website, you are required to enter certain shipping information before proceeding to the page containing the weight field. If the auto fill feature in the **FedEx Rate Finder** tab is enabled, the application will populate the fields on the first page of **FedEx Rate Finder** for you and proceed to the next page to populate the weight information automatically. Or you can set the application to just launch the first page of **FedEx Rate Finder**. Once you fill in the information and proceed to the next page, the application will automatically place the weight information in the appropriate field.

add web page

Use the Add Web Page feature to add a new web page to the Auto-Launch website list. The application will remember the address and information for the website and automatically populate the corresponding fields.

The Add Web Page feature will open a browser for you to navigate to your desired page. You can fill in the information and add the page to the application. After adding the page, you can choose it as the auto-launch site just like any other system pre-defined web page. Once an item is placed on the scale, the application will launch the web page and populate the fields with the information you filled in during the Add Web Page process.

To add a new web page to the application,

- 1. Right click System Tray icon and choose Options.
- Choose the Add Web Page tab, which contains information from the web pages you have added.

17

- Click Add and the Add New Auto Fill Web Page dialog appears. Follow the instructions on the dialog to add the web page to the application step by step.
- 5. Assign a **Name** to the page you want to add. This name will appear later in the Auto-Launch website list.
- Press Next to open the browser and go to your desired webpage.
- 7. Press Next when the page has finished loading.
- 8. In the browser, fill in the information you want the software to automatically populate for you.
- Specify the weight field on the page with the following values such that the application will populate the field with the reading of the scale in the appropriate format.
 - LB—populate with weight in pounds
 - **OZ**—populate with weight in ounces
 - · KG—populate with weight in kilograms
 - G—populate with weight in grams

NOTE If the web page field for weight is in ounces, OZ should be typed in the field. If the reading of the scale is 6.1oz, the application will populate the weight field with 6.1 when the web page is launched.

- 10. Select **Finish** to save the information and add the webpage.
- 11. You will now see the information you've just added whenever you select the Add Web Page tab. Click OK to confirm what you have done.
- 12. After adding the web page, you can choose it as the auto-launch web page.

To delete a web page that you have added

- 1. Right click the System Tray icon and choose Options.
- 2. Choose the Add Web Page tab.
- 3. Select the page you want to delete from the list.
- 4. Click Delete. A delete of devi toba antecondo
- 5. Click OK.

troubleshooting

"DETACH" alert

When the scale is detached, you will see a black X on top of the System Tray icon. You will also see the word "**DETACH**" in the top right corner of both the normal and small displays.

"ERROR" alert

The word "ERROR" will appear in the bottom right corner of the normal and small displays if the scale reading is less than zero or the item you are trying to weigh is too heavy. You may need to tare the scale again if the weight displayed is negative. Remove the item from the scale if it is over 10 lbs.

RadioShack.

the fcc wants you to know

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- · Reorient or relocate the receiving antenna.
- · Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult your local RadioShack store or an experienced radio/TV technician for help. If you cannot eliminate the interference, the FCC requires that you stop using your phone. *WARNING*: Changes or modifications not expressly approved by RadioShack may cause interference and void the user's authority to operate the equipment.
