

Kiosk Printing Solutions

As a leading printer manufacturer, Star Micronics has amassed years of experience in working with a variety of Kiosk applications. Star has utilized this experience to design Kiosk printing solutions available in complete packaged and mechanism models, in both thermal and impact technology. Star Micronics has provided choices in thermal and matrix products with autocutter and presenter options allowing the customer maximum flexibility.

SP349

Impact Dot Matrix

SP349 - Packaged Printer

UP389 - Packaged Printer with Presenter

For those who require the output of a Matrix printer or have a need for multi-copy capability, there is the choice of the SP349 or UP389 with Presenter. Specifications for both printers can be found with the SP300 Series on page 20.

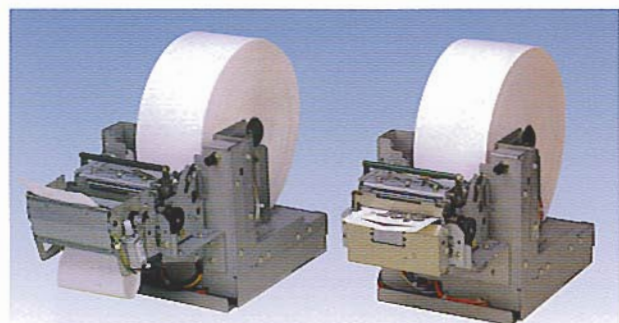

The Star Presenter, whether used in a matrix or thermal solution is unique to Star and has distinct advantages over its competition.

Thermal

TUP452

TUP492 - with Presenter

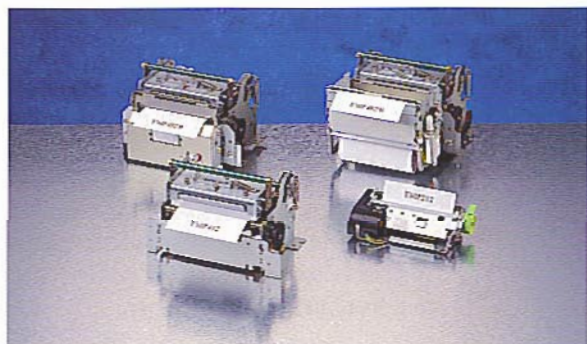

The TUP400 series was designed to meet all the needs of the demanding Kiosk environment. The TUP400 includes three levels of paper sensing, a large paper supply roll, straight paper path and full printer status reporting to allow long term reliable operation with minimal servicing. The TUP492 utilizes a variable length presenter with document capture ability to support jam-free operation.
