

## Portion Control Scales

**Fast, and accurate portion control at an  
affordable price!**

## Application

The Yamato SKY Series Stainless Steel Dial Scales were developed exclusively for the environments found in Professional Kitchens and Food Processing Plants. They are ideal for portion control and recipes.

## Quality construction

The outer housing is made with stainless steel with all other components, both inside and out, also constructed of corrosion resistant materials. The strong under-platform structure has two supports and mechanical overload stops. The dial chart is a clear, shatterproof plexiglass.

## Sanitary

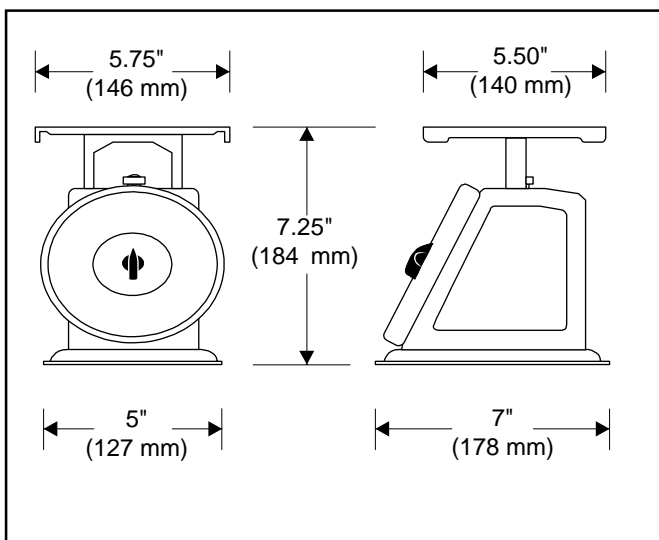

The SKY Series meets all current sanitary requirements of U.S.D.A.

The 5½" (140mm) diameter dial is slanted 30°, eliminating the need to stoop or bend down to get accurate weight readings. All black graduations on a white background are clearly marked for fastest possible weight determination. The balanced, extra lightweight indicator further enhances fast and accurate readings.

## Service and maintenance

Service and maintenance are available through hundreds of Yamato Dealers in the United States and Canada.

## Dimensions

## Capacities

MODELS	CAPACITIES
SKY-1K	1 kg x 5 g
