

# Weight Data Collection Tracking / Bonus

Advatek Systems provides a comprehensive solution for seafood producers to collect production data on how much meat or product is being produced by the workforce.

It has everything you need to implement an employee incentive (bonus) system, as well as providing management with valuable real-time production data to track the labour cost per pound and cost per hour, by product and by worker.

It works by having employees scan an identification badge when weighing in the product they have produced.

The operator selects the current product using the keypad, and employees scan in and out of the bonus job function to accurately track the time worked.

### TIMETEK SOLUTIONS

- INCENTIVE BONUS WEIGHING

By bringing together the net weight produced and the time worked the system calculates each employees rate of work in three key metrics: LBs-per-Hour, Dollar-per-LB, Dollar-per-Hour and determines a bonus dollar amount that was earned.

The calculation can be different for every product they work on, as each product has parameters (“target LBs/hour” and “Bonus \$/Lb”) that are adjustable to allow the producer to customize the bonus payout for their plant and for the season.

Prices are grouped into sections;

- Bonus Weight Indicator
- Bench scale
- Weight Tracking Bonus software
- Extras

Bonus Report  
From: 08/01/2017 To: 14/01/2017

From: Sun May 19, 2002 To: Sun May 26, 2002
