

Store/Supply Shop For Processors

TIMETEK SOLUTIONS

• STORE SHOP

Advatek provides “**Store Shop**”, a system that tracks the dispensing of workplace related items such as gloves and boots to employees.

The store shop area is equipped with a touchscreen kiosk computer terminal that works similar to a retail POS terminal.

It’s easy to use - a list of all the items that can be purchased, along with the cost to the employee, appear on the screen as buttons that can be selected.

When an employee has items they need they will first swipe their scan badge to authorize the purchase. Next the store clerk clicks off each item they provide, loading an on-screen “shopping cart”.

Once the clerk completes the order an optional receipt can be printed, and the total amount owed is recorded in TimeTek. It is shown on reports and can be deducted from the employee pay. In addition a report can be generated showing what is left in inventory, and notify when the stocks run low.

The **Store Shop** kiosk requires a connection to the building network and the TimeTek db server.
